

Johar !

Johar ! Welcome to Lohardagga.

Not very long ago, this village was similar to many other village of Jharkhand – deprived, backward and neglected.

Not anymore.

People are no longer impoverished. They are employed .Either in dairy farming or in poultry farming. And they are being guided by trained professionals from reputed institutes.

*Byte – Mahua Roychowdhury.*

These professionals chose hardships of village over luxuries of city. They slog in the blazing sun. And enjoy in the starry night. But how come their motivation level remains same over so many years? The answer lies with Deep Doshi . The man who has been able to retain them for so long.

*Byte – Deep Doshi*

Deep Doshi, an engineer himself, is a man with mission. His approach is simple – Employ the best human resource. Use their expertise in the growth of rural sector - by exploiting available natural resources and creating sustainable employment opportunities for the villagers. Make the villagers self reliant. And that is where his magic lies. He ventured where others didn't try. He created opportunities where they lay hidden. He gave hope where there was none.
